### PROFESSIONAL SUMMARY

Computer Science student in the 7th semester with hands-on experience in software development, process automation, and technical support. I build applications and APIs using JavaScript, TypeScript, Node.js, React, and relational databases. Experienced with n8n and Microsoft PowerApps for system integration and reducing repetitive operational work. Seeking an opportunity as a Junior Software Developer or Software Engineering Intern.

### PROFESSIONAL EXPERIENCE

|                                                                                                                                                                                                                                                                  |                |
